## **DETAILED ACTION**

### ***Terminal Disclaimer***

The terminal disclaimer filed on 9/5/08 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of any patent granted on Application No. 11/436,619 has been reviewed and is accepted. The terminal disclaimer has been recorded.

### ***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance: The present invention is related to current management in a battery powered hearing aid amplifier. Independent claims 1 and 5 identify the uniquely distinct feature of reducing current load by temporarily disconnecting the receiver which supplies a sound pressure level in a hearing aid device to manage battery current and extend battery life in combination with all the disclosed limitations of claims 1 and 5. the closest prior art, Seligman (US 7,120,500) discloses controlling power demands in devices with DC power supplies by reducing power demands in steps before entirely powering down the device but fails to teach a receiver for providing a sound pressure level and temporarily disconnecting the receiver to reduce the current load and Engebretson (US 5024224) discloses the use of rechargeable batteries in medical devices. The prior art fails to anticipate or render the independent claims obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian Ensey whose telephone number is 571-272-7496. The examiner can normally be reached on Monday - Friday 6:00 AM - 2:30 PM.
